Filter Production

About us

A knowledge_based company

Agriculture industry

Produce Filters for heavy machinery

Our Certificates

ISO 9001,10001,10004

Other standards

Our products

Air Filter

Oil Filter

Fuel Filter

An aerial photograph showing a red tractor and a yellow trailer in a field. The tractor is positioned at the front of the trailer, and they are both oriented diagonally across the frame. The field is a mix of brown and green, suggesting it might be a dry or partially harvested area. The background is a solid orange color.

Oil Filter

The function of the oil filter is to purify the oil of the device.

Since oil is pivotal in compressor systems and turbines.

In addition the oil filter is also has an important role to purify the oil and prevent the entry of various pollutants.

The Oil is used in compressors and turbines for lubrication and cooling of moving and rotating parts such as bearings, The gears and the pumps themselves, which are heated by wear and movement are utilized.

Air Filter

Quality of filters that is produced by this company using a variety of filter papers (Cellulose and Fiberglass) and in class (Course, Medium & Fine G1-F9) is suitable for any type of climate zone.

An aerial photograph of a red tractor in a field of dry, brown grass. A yellow rectangular box, representing a fuel filter, is overlaid on the tractor's fuel tank area. The right side of the image is a solid orange-red gradient.

Fuel Filter

A fuel filter is a filter in a fuel line that screens out dirt and rust particles from the fuel. Hoopad company can provide these type of filter in less price and better quality.
